

The Horseshoe

The 'horseshoe' style seating arrangement is an effective way of increasing dynamic interaction between students and the lecturer, who is able to move right into the centre of the room.

Having stood the test of time, this layout is proven to increase collaboration in lectures.

Developed originally by Harvard Business School, this arrangement of seats and desks delivers excellent sightlines around the room and promotes the feeling of inclusivity between students.

The Horseshoe can incorporate either fixed, swivel or swing arm seating.

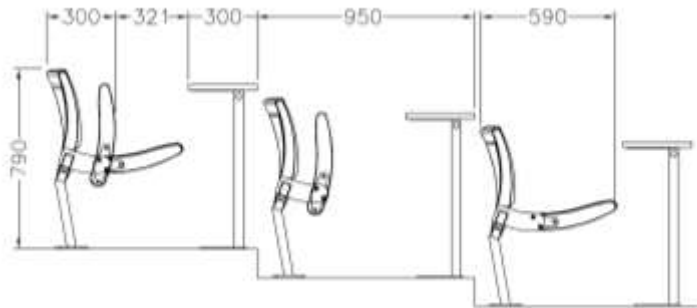

Features include:

- Fixed or swing arm system seats
- Contoured upholstery
- Power and data provision
- Multiple desking options
- Adaptable layouts
- Suitable for flat floors and tiers
- Sense of collaboration
- Integrated DDA spaces
