

Lecture HBS

The HBS seating system was developed to support collaborative learning styles with its innovative 'swing away' pivot arm and auto return.

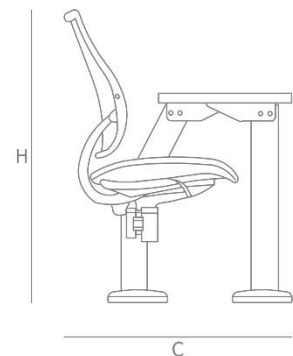

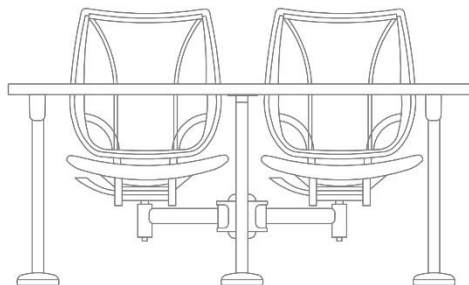

In turn and learn mode, two rows of seats and desks are fitted to each tier in the lecture theatre. By fixing the seats on swing away arms, the product remains fully code compliant with seat way and fixing requirements.

Available with a choice of executive style seating and many material options for writing desks, the HBS system is flexible and can be tailored to meet a variety of room configurations.

With intermediate legs for each pair of seats, swivel function and a self containing device the HBS is a flexible and functional collaborative learning system.
